NGANTY BIKELE ANICET MARIUS

Software Engineering Student — Frontend Development & Cybersecurity

Douala / Yaoundé, Cameroon | ngantybikele@gmail.com | +237 694 121 491 / 696 584 160 | linkedin.com/in/anicet-nganty-bikele

PROFILE

Master 2 Software Engineering student at the École Nationale Supérieure Polytechnique de Douala, combining dynamic frontend interface development (React.js, Angular, TypeScript) with a cybersecurity mindset (OWASP principles, API communication security). Hands-on experience in a SaaS environment through a remote internship for a Quebec-based company, with a strong ability to design modular, maintainable and secure interfaces. Seeking an internship to put this dual skill set at the service of a demanding technical team.

TECHNICAL SKILLS

- **Front-End Development :** Building reactive applications with React (TypeScript) and Angular. Modular architecture based on reusable components, advanced state management (NgRx, RxJS, Context API), lazy loading and complex reactive forms
- **Integration & Security :** Securing data flows with JWT interceptors, protection against XSS/CSRF vulnerabilities (OWASP principles) and REST API integration
- **UX/UI Design :** Wireframing and interactive prototyping in Figma (persona creation, design system)
- **Tools & Version Control :** Version control with Git/GitHub, performance and accessibility auditing (Lighthouse), Jira, Postman, Slack, Miro
- **Methodologies & Productivity :** Scrum project management (Jira, Miro), continuous productivity improvement through generative AI

PROFESSIONAL EXPERIENCE

Front-End Developer Intern — *Formuloo, Quebec, Canada (100% remote)* *March 2026 – July 2026*

- Structuring applications into Feature Modules and a modular architecture (Angular CLI, TypeScript), with lazy loading and route guards
- Managing complex data flows with RxJS and implementing NgRx for state synchronization across the critical accounting modules of a multi-tenant SaaS ERP
- Building and managing complex reactive forms (Angular Reactive Forms)
- Applying OWASP principles (XSS/CSRF protection) and securing API communication through JWT interceptors
- Integrating UI components and applying the Design System (Angular Material, HTML, SCSS); auditing performance and accessibility (Lighthouse, Angular DevTools)

Front-End Developer (Project / Training) — *Orange Digital Center, Douala, Cameroon* *November 2024*

- Designing and developing interactive web interfaces within a cross-functional team (designers, developers)
- Integrating smooth, immersive animations with the GSAP library to enhance user journeys.

PROJECTS

Blog Application Modular blogging application built with Angular, integrating a complete REST API for secure management of users and articles

Restaurant Application — React.js

- Designing a responsive web application featuring a real-time table booking system via WhatsApp and a menu catalog filterable by category

Multi-tenant Accounting SaaS ERP (Formuloo) — Angular + RxJS/NgRx

- Designing and developing the interface of a financial application compliant with OHADA standards, with modular architecture, role-based secure routing (RBAC) and complex reactive forms for accounting entry input

EDUCATION

École Nationale Supérieure Polytechnique de Douala — MSc Software Engineering *Oct. 2022 – Jun. 2027 (ongoing)*

Lycée Général Leclerc de Yaoundé — Scientific Baccalaureate (Series D) *2019 – 2022*

CERTIFICATIONS

- Connect and Protect: Networks and Network Security — Google (July 2025)
- JavaScript Programming — Meta (August 2025)
- React.js Library — Meta (December 2025)
- Node.js — IBM, on Coursera (in progress)

LANGUAGES & INTERESTS

Languages: French (native), English (intermediate) | **Interests:** Football, Swimming, Music
